PROFESSIONAL SUMMARY

Certified Ethical Hacker (CEH) with hands-on experience in penetration testing, vulnerability assessment, and web application security testing. Proficient with Metasploit, Burp Suite, Nmap, Nessus, Wireshark, and Hydra on Kali Linux and Parrot OS. Familiar with SOC fundamentals, threat detection workflows, and security documentation practices. Also experienced in Python-based development and embedded systems through real-world academic projects. Seeking an entry-level role in cybersecurity to apply and expand these skills in a professional environment.

CERTIFICATIONS

- Certified Ethical Hacker (CEH)** — EC-Council 2025
- Google Cloud Cybersecurity Certificate** — Google 2025

TECHNICAL SKILLS

Offensive Tools: Metasploit, Burp Suite, Hydra, Nmap, Nessus, Wireshark

VAPT Skills: Reconnaissance, Scanning & Enumeration, Exploitation, Post-Exploitation, Reporting

SOC & Monitoring: SOC Fundamentals, Threat Detection, Log Analysis, Security Documentation

Networking: TCP/IP, DNS, HTTP/HTTPS, Packet Analysis, Network Troubleshooting

OS & Programming: Kali Linux, Parrot OS, Windows | Python (basics), HTML

Platforms & Labs: TryHackMe (72 rooms completed, Top 8% global ranking, 10 badges) | VirtualBox (lab environments)

PROJECTS

Vulnerability Assessment & Penetration Testing — Lab | Nmap | Nessus | Metasploit

- Conducted full VAPT cycle: reconnaissance with Nmap, vulnerability scanning with Nessus, and exploitation using Metasploit across lab targets.
- Identified open ports, exposed services, and exploitable misconfigurations; documented findings with CVSS severity ratings and remediation recommendations.

Web Application Security Testing | Burp Suite

- Tested for SQL injection, XSS, and authentication flaws by intercepting and manipulating HTTP requests using Burp Suite.
- Documented each vulnerability with proof-of-concept reproduction steps and developer-level fix recommendations.

Network Traffic Analysis & Threat Detection | Wireshark

- Captured and analyzed 500+ network packets; flagged suspicious DNS and HTTP traffic patterns with documented mitigation measures.

Real-Time Object Detection System | YOLOv4 | Raspberry Pi | Python

- Developed and deployed a real-time vehicle detection system on Raspberry Pi using YOLOv4 trained on custom annotated datasets.
- Applied Python scripting and hardware integration skills to build a functional ML pipeline on resource-constrained hardware.

EXPERIENCE

Ethical Hacking Intern | AICTE Virtual Internship Program

Oct – Dec 2024

- Learned core ethical hacking concepts including types of hackers, hacking phases, cyber threats, and attack methodologies through a structured virtual program.
- Gained foundational knowledge of cybersecurity principles, vulnerability concepts, and responsible disclosure practices.

EDUCATION

B.Tech — Electronics & Communication Engineering

2025

Gayatri Vidya Parishad College of Engineering (Autonomous), Hyderabad

Diploma — Electronics & Communication Engineering

2021

Sri Venkateswara Polytechnic College
